PROFESSIONAL SUMMARY

A Software Engineer with hands-on expertise in building data-driven applications using Python, Django-based RESTful APIs, and SQL optimization. Proficient in developing end-to-end ML pipelines, integrating predictive models into production-ready software systems, and designing interactive dashboards. Experienced in transforming complex datasets into scalable, maintainable software solutions with a strong focus on clean architecture and performance.

EXPERIENCE

Software Development Engineer Intern *miniOrange Security Software Pvt. Ltd.*

April 2026 - Present

- Researched and developed proof-of-concept agentic AI systems using LLMs, RAG, and tool-calling architectures to automate enterprise workflows.
- Built scalable backend services and REST APIs in Python and FastAPI for integrating AI-driven automation into internal business.
- Developed a middleware payroll automation platform integrating Zoho People and Zoho Payroll to streamline employee reimbursement and payroll record management.
- Implemented OCR-based document processing pipelines for automated extraction and validation of reimbursement bills and payroll-related records.
- Worked on AI-driven document classification and anomaly detection systems to identify inconsistent claims, duplicate entries, and payroll irregularities.
- Reduced manual intervention and fragmented email-based communication by consolidating payroll, reimbursement verification, and approval workflows into a centralized platform.

Data Science Intern *Paarsh Infotech Pvt. Ltd.*

6 Month

- Improved predictive analysis accuracy by 15% by developing and tuning ML models for business insight generation using Python, Scikit-learn, and SQL optimization techniques.
- Accelerated reporting turnaround by 30% by building interactive dashboards in Power BI and Tableau, translating complex data pipelines into stakeholder-ready visualizations.
- Enhanced data pipeline efficiency by 20% by performing systematic data preprocessing, feature engineering, and exploratory analysis using Pandas, NumPy, and Matplotlib.

PROJECTS

Human Resource and Workforce Analytics (*Paarsh Infotech Pvt. Ltd.*)

Jan 2026 – May 2026

- Built attrition prediction model on IBM HR Analytics Employee Attrition Dataset with 88% accuracy using Scikit-learn
- Developed automated attendance & leave system using OpenCV and PostgreSQL (e.g., face-based check-ins with real-time leave tracking & approvals).

AI-Powered Quiz Generator from PDF with Performance Analytics

Jul 2025 – Oct 2025

- Achieved 90% quiz relevance accuracy by integrating Gemini API with custom NLP pipelines using spaCy and Scikit-learn to extract and classify content from PDF data inputs.
- Improved student performance tracking by 40% by building real-time sentiment analysis and analytics dashboards with Streamlit and Firebase backend.

Handsign Learning Application

Jan 2025 – Apr 2025

- Reached 92% hand-sign recognition accuracy by training a TensorFlow Lite deep learning model integrated with Google ML Kit for real-time on-device inference on Android.
- Enhanced learning outcomes by 35% by incorporating text translation and video tutorial features, validated through user testing across 50+ sessions.

TECHNICAL SKILLS

Programming & Scripting: Python, MySQL, PostgreSQL

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, spaCy, FastAPI, LangChain, LangGraph

Tools & Technologies: Git, Jupyter Notebook, Google Colab, Tableau, VS Code, Postman

Core Concepts: Predictive Modeling, Machine Learning, NLP, Data Pipelines, Data Visualization, Statistics, Deep Learning

Soft Skills: Team Collaboration, Problem-Solving, Time Management, Adaptability, Communication

EDUCATION

Master of Computer Application | Jawaharlal Nehru Engineering College, MGM University

2024 – 2026

SGPA: 8.47 (3rd Semester) | Chh. Sambhajanagar, India

Bachelor of Computer Application | Hi-tech College of Management & Computer Science, BAMU University

2021 – 2024

CGPA: 7.05 | Chh. Sambhajanagar, India

HSC (12th) | Saraswati Intermediate College, U.P. State Board, Prayagraj

2019 – 2021

Percentage: 72% (PCM) | Prayagraj, India

SSC (10th) | Eureka Infosys School, M.H. State Board, Chh. Sambhajanagar

2019

Percentage: 77% | Chh. Sambhajanagar, India

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Statistics for Data Science | Complete Django Framework | Complete Scikit-learn for Machine Learning

Achievements: 5-Star HackerRank SQL | 1st Place – Department Glance | First Prize – Speech Competition
